

Fruit Bowl Activity for Grade R +

- Discuss the different fruits with the children: Watermelon, banana, apples, orange and pineapple.
- Ask them if they know what colours the fruits are, including the fact that apples can be red or green. If possible, try to show them examples of the real fruits.
- Let the children colour in all the pictures.
- Depending on the age of the children, either the teacher or the children can cut out the pieces of fruit and the bowl. You might want to make an “opening” in the bowl by cutting a slit along the front top rim.
- On a new piece of paper or cardboard, arrange the fruit in the bowl and stick it down with glue.
